

MGOZ Q 1/2019 - Quotation for the Hiring and Installation Services of a Public-Address System and Lighting Decorations for Valentine's Day Event at Villa Rundle Gardens

Clarification No. 1

Decorative Lights specifically-Lot 2

Question

a) Please can you explain what lumens or watts for each up lighter you need?
What beam angle you need?

Answer

The uplighter shall provide a narrow beam with sufficient lumens/wattage enough to illuminate the full length of the palm trees.

Question

b) Please can you explain what lumens or watts for each uplighter you need?
What beam angle you need?

Answer

Spotlights need to be sufficient to illuminate figures from close range.

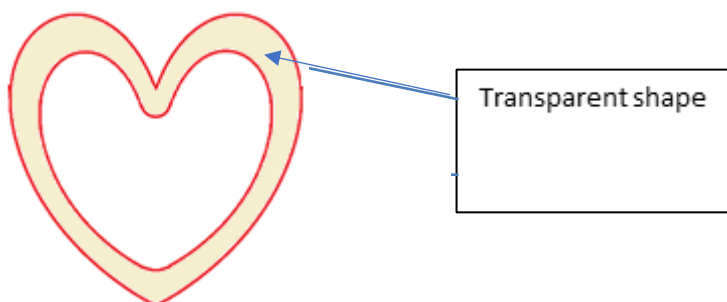

Question

c) Please can you give us more explain or give us examples of what you mean by transparent?
Where you say, the support shall have fairy lighting wound in spiral around it, this has to be 3D or 2D?

Answer

The heart shapes can be made from a rigid transparent material such as acrylic glass or a similar shatter-proof, material.

Being a spiral, the fairy lights have to be wound in a 3D helix shape.

Question

e) Please can you indicate how many leds and the length do you need per each tree?

Answer

Enough to create the effect shown in the picture in the tender document.

Question

This has to be warped to the branch and the trunk or only to the branches?

Answer

Only the branches are to be decorated as per diagram 'Decoration no.3'

Question

The distance between each string lights when you are warping?

Answer

Enough to create the effect shown in the picture in the tender document.
