Clarification No. 3

Question No. 1

‘With reference to the above mentioned tender and the supply for 32m HDPE pipe kindly note that on the technical specifications (Section 4 item 2.1.1) and Technical offer (item 2.1.1) the pressure rating is shown as PN 6 while on the financial bid form item 1) this is shown as PN16; which is the correct pressure rating to follow?

Answer No. 1

The correct pressure is 16 bar. The Technical Offer Form is being amended and re-uploaded accordingly.

Question No. 2

Also since the requirement is for High density Polyethylene (HDPE)please confirm that the pipes shall be supplied according to EN 12201 PE100.’

Answer No. 2

Pipes may be supplied according to standard BS EN 12201.
