

11th June 2018

REFERENCE NUMBER: MGOZ/MPU/ T 26/2018

Tender for the Supply and Delivery of Waste Bins, Smart Sensors and the Platform for Sensor Device Connectivity in Connection with the Consume-Less Project funded through the INTERREG MED PROGRAMME

Clarification No. 3

Q1) Is it possible for the bin body to be produced in light metal instead of polymer material?

A1) As per Technical Specifications in Tender Document, the bins should be made of plastic. Only items compliant to the technical specifications in tender document will be considered.

Q2) Is this tender suspended or does it need to be re-submitted by the 19th of June?. Will the specifications remain the same?

A2) The Contracting Authority wish to inform that due to a Pre-Contractual Appeal logged at the PCRB, the tendering process is being suspended until further notice. At this stage, the Contracting Authority is not in a position to confirm or otherwise whether technical specifications will be altered or otherwise as this depends on the outcome from the PCRB report.

Q3) We would like to know where will the poster frames be attached, as in, on which sides of the bin are they going to be on the front or sides etc.

A3) There are no particular positions where the poster frames are to be attached as long as they are clearly and prominently visible. No particular material of the poster frames is being requested.
